

Sussex Community
NHS Foundation Trust

Digital Transformation inside the NHS

Completely impossible and absolutely vital

Excellent care at the heart of the community

The health system is complicated!

- Colossal UK health time bomb
- The bet on innovation
- Hostile national bodies
- Failed centralised big initiatives
- Future success dependent on total local collaboration
- Political meddling shattered trust
- Frontline is still lacking the basics
- We love the NHS, fight to stop change, but don't understand when it doesn't work seamlessly.
- **My favourite digital job.**

Sussex Community NHS

- 9000 patients a day
- 5000 staff
- 83 services
- 120 locations
- 1000 miles²
- £245m

a day in the life

CIO material?

Public Health
England

What to do?

- Patients matter
- Ask how to help do your job better
- Service Design before Technology delivery
- Bring the board on the journey
- Foster your network
- Open to innovation
- Lead through the complexity

The big questions

- Enough support for digital culture change?
- Enough ROI in the Cloud?
- Major systems suppliers help or hinder?
- Small data 1st: local system patient data flow?
- National funding without too many strings?

Future Diabetes Care

- Type 1 Diabetes
- Population monitoring Data
- Monitors
- Remote Nurses
